

Pentest Program Management

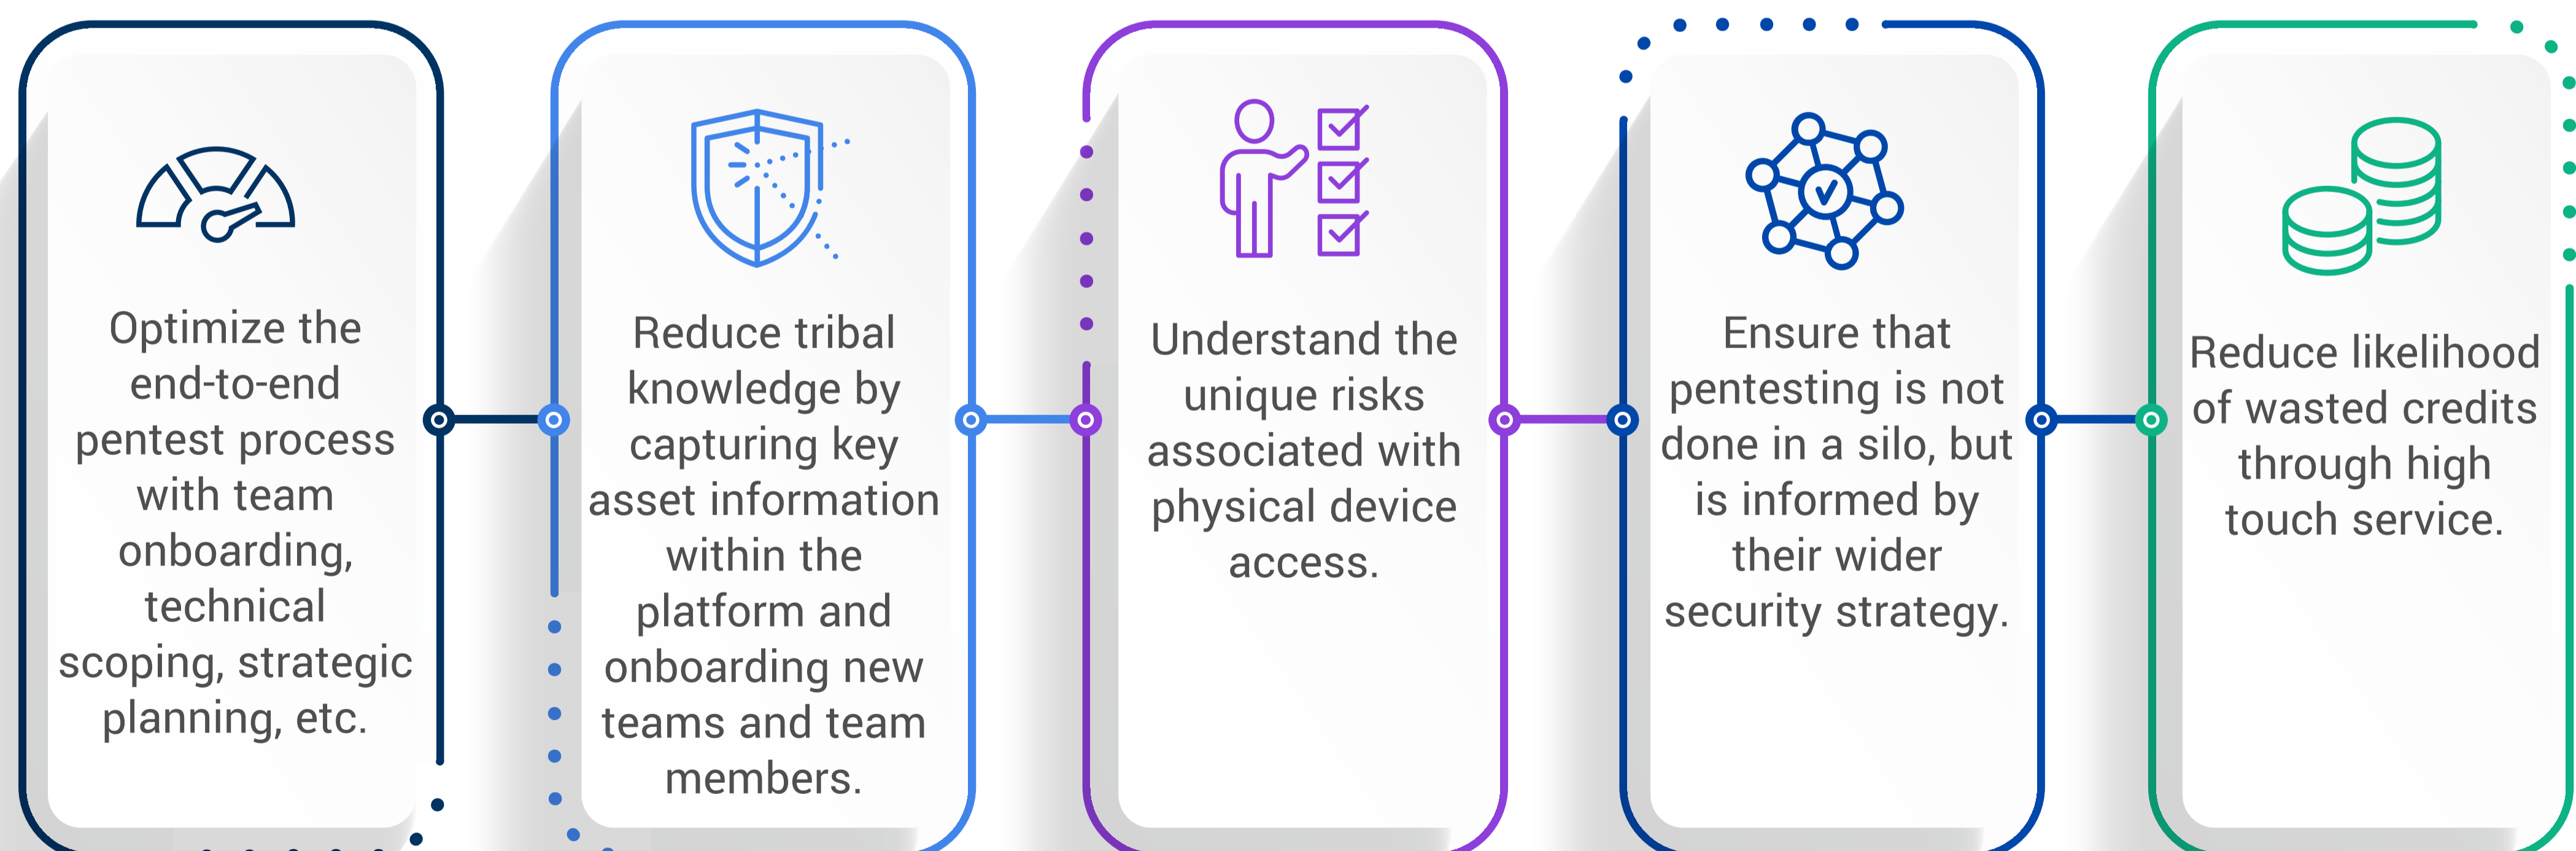

Overview

From planning and scoping, to onboarding and remediation, our Premium Pentest Program provides the strategic guidance and partnership needed to take your pentesting program to the next level.

Whether your organization has tens, hundreds, or even thousands of applications, keeping track of your assets and the teams responsible for their development, maintenance, and security can be an operational nightmare.

That's where our Pentest Program Manager comes into play. From day 1, you'll be partnered with a seasoned security consultant to help with asset identification, prioritization, pentest setup, integration support, recurring security roundtables, strategic planning, and more. Consider your Pentest Program Manager an extension of your security team.

Key Benefits

Offering Details

Onboarding for All Teams

From account setup to platform walkthroughs, we'll ensure your teams have the information they need to succeed. Additionally, we'll be available to provide comprehensive platform walkthroughs for your teams in a group setting.

Strategic Planning

Starting with your end goals in hand, we'll help you build out an optimal testing plan based on asset criticality and business needs. We'll also provide ongoing scheduling guidance to enhance your pentest program's effectiveness.

Define Scoping with Dev Team

With a deep understanding of your applications, we'll help define the information required for each pentest. This ensures that your teams are providing the maximum information to the pentesters, which in turn improves the value of each pentest.

Pentester Guidance

We'll go beyond monitoring active pentests, providing additional guidance based on technical and operational knowledge. For example, if a Pentester is not sure where they should focus their time between two features, we'll provide guidance based on intel gathered in the initial scoping.

Technical Remediation Guidance

We'll partner with your internal teams to help track and manage remediation efforts. While your internal teams will make the fixes, we'll provide guidance every step of the way, as well as follow up on a regular cadence to help track remediation versus target.

Quarterly Maturity Assessment

Utilizing objective scoring and concrete guidance, we can help take your program to the next level. Each assessment will be done using Cobalt's framework for maturity, which is based on data from our 800+ customers.

Don't see what you need? If you can dream it, we can build it.
